BAKHTAWAR KASHIF

Lahore, Pakistan | +92 321 6020346 | engr.bakhtawar1@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with a B.S. in Computer Engineering (CGPA 3.53) and 2+ years of experience shipping production web applications, reusable SDKs, and AI-driven engineering automation across 2 global identity-verification products (Shufti Pro, Facia). Strong foundation in object-oriented programming, REST API integration, and SQL/NoSQL databases, with hands-on Python and Linux experience. Known for turning complex requirements into clean, maintainable, user-focused software.

EDUCATION

Information Technology University (ITU), Lahore 2020 – 2024
B.S. in Computer Engineering | CGPA: 3.53 *Lahore, Pakistan*

- Academic Achievement Award (Crystal Shield); IEEE Society Volunteer.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, Java, PHP
Frameworks: React.js, Next.js, Vue.js, Angular, Node.js, Laravel
Databases: MongoDB, MySQL, Firebase
Core: OOP, Data Structures & Algorithms, REST APIs, Web SDK Development, Debugging, Optimization
Tools: Linux, Git, AWS, ClickUp, Claude Code Action, Vivado, RISC-V

PROFESSIONAL EXPERIENCE

Programmers Force 2024 – 2026
Frontend & Full Stack Developer *Lahore, Pakistan*

Shufti Pro — Global Identity Verification Platform

- Engineered and maintained enterprise-grade frontend applications in 3 frameworks (React, Vue.js, Angular) powering KYC, KYB, AML, and onboarding workflows for global clients.
- Architected reusable Web SDKs that let clients embed identity verification across platforms with consistent behavior.
- Partnered with backend teams to integrate REST APIs and verification workflows; diagnosed and resolved client-specific issues and customization requests.
- Optimized UI responsiveness and feature performance across enterprise products, improving the end-user verification experience.
- Extended backend services and internal tools with Laravel and MongoDB, including data modeling and queries.

Facia — AI-Powered Identity Verification Product

- Delivered frontend features and reusable UI components for an AI-powered identity-verification product, integrating verification workflows, third-party libraries, and ML models.
- Established a reusable frontend architecture that improved scalability and maintainability.

AI Engineering Automation — Claude Code Action

- Built 6 specialized AI agents (frontend, backend, database, DevOps, project management, orchestration) across Shufti Pro repositories.
- Designed orchestrated multi-agent workflows and reusable skills that automate the development lifecycle from ClickUp requirement to deployment.
- Improved engineering productivity through automated repository context and task-execution pipelines.

10x Engineers 2024 – 2024
Trainee Engineer *Lahore, Pakistan*

- Gained hands-on experience in Python, Linux, Vivado, and RISC-V, working on low-level systems and software development workflows.

Information Technology University (ITU) 2023 – 2024
Teaching Assistant *Lahore, Pakistan*

- Guided students in data analysis and statistical workflows using STATA; supported coursework, lab activities, and technical mentoring.

PROJECTS

AI-Powered Self-Checkout System (Final Year Project) | Python, Computer Vision, ML, React, Vue.js, IoT

- Developed an AI-powered checkout solution using computer vision and machine learning for real-time product detection, with integrated frontend dashboards.

Cake Bakery Shop Management System | PHP, MySQL, JavaScript

- Built an end-to-end management system for orders, inventory, and operations on a relational MySQL schema.

Online Bakery Mobile App | Java, Firebase, Android Studio

- Developed an Android ordering and customer-management app using object-oriented Java and Firebase (NoSQL).

CERTIFICATIONS

Claude Code Action; AWS Cloud Foundations; AWS Data Engineering; Google Technical Support Fundamentals; ROS Workshop.
